

Evoilve and Expro enter into integrated partnership to advance digital well integrity management

Evoilve and Expro (NYSE: XPRO) are advancing digital well integrity management with the launch of **SafeWells® V5**, a next-generation digital platform designed to help operators improve visibility, strengthen operational assurance and make better-informed decisions across the well life-cycle.

Developed and brought to market through collaboration between **Expro** and **Evoilve**, **SafeWells® V5** combines **Evoilve's** next-generation cloud technology and **Expro's** well integrity expertise to deliver a smarter, more connected approach to digital well integrity assurance.

SafeWells® V5 extends beyond traditional integrity issue management to provide a comprehensive well and barrier management solution, helping operators connect data, people and processes, standardise workflows and strengthen assurance across increasingly complex well portfolios.

As **SafeWells® V5** is built as a module within Evoilve's advanced **CollabEMS®** enterprise platform, customers will benefit from the platform's microservices and modular expandability with other Evoilve products to integrate workflows, minimise system integrations and simplify application landscape.

SafeWells V5's integration into Evoilve's modular technology platform provides a seamless data and workflow integration covering the full well life-cycle.

SafeWells® V5 is already gaining traction in the market. **Evoilve** and **Expro** have jointly delivered solutions and issued quotations covering tens of thousands of wells, while the platform is currently live with several customers.

Alan Quirke, Vice President for Well Intervention & Integrity at Expro, said:

"The industry is increasingly looking for digital solutions that combine technical innovation with practical operational expertise. Through our partnership with Evoilve, we have created a platform that helps operators take a more connected and proactive approach to managing well and barrier performance throughout the asset lifecycle."

*"**SafeWells® V5** represents a significant step forward in digital well integrity assurance, connecting data, people and engineering expertise to help operators safeguard well integrity, maximize well availability and strengthen operational assurance."*

About Evoilve

Evoilve is a specialist software technology company delivering digital solutions for the energy industry. Its flagship Well and Enterprise Management Platform, **COLLAB EMS®** & **COLLABWELLS®**, on which **SafeWells® V5** is built, connects data, information, people and processes across the complete well lifecycle.

The platform helps operators streamline workflows, improve operational efficiency and make faster, better-informed decisions. Built on modern microservices and a modular, AI-ready architecture, Evoilve's technology automates routine analysis and transforms operational data into visual overviews and actionable insights.
